

Use of Membership Database

Use of Membership Database

This policy applies to employees and volunteers. The membership database software and the content management system software are substantial investments for the Society for Vascular Surgery® (SVS) and include substantial proprietary and valuable information, both in the data, data tables, views, stored procedures, and components. In order to protect the propriety of this database and the SVS' investment, all employees and volunteers are required to abide by the following policy:

The membership database software and the content management system software for the SVS website are the exclusive proprietary property and content of SVS. No employee or volunteer will utilize or share the data, data tables, views, stored procedures or components of the database, or any derivative or reincarnation for any purpose other than SVS-approved programs, without the explicit written consent of the Executive Director.
