# Hot Topics

To further help SVS members better meet challenges they are facing in their practices, the Society is working with health experts to produce a series of hot topic articles and webinars to address specific issues of concern.

- **2021 Coding Webinar**

Join SVS Coding Committee review the development of E/M changes including rationale; the E/M code set; how to employ the E/M changes to your practice; financial impact of E/M to vascular specialty and practices; and how the specialty can promote more favorable reimbursement strategies and coverage.

- 

- **Physician Employment Models**

Vascular surgeons are employed primarily across three practice models: private practice and group practice, traditional academic health systems and larger healthcare systems (i.e., Kaiser Permanente). Through this webinar we will explore the opportunities and potential limitations, inherent within each employment model.

- **Hiring for the Right Clinical Fit *Craig Southerland***

Hiring for the Right Clinical Fit summarizes tips and tools from the recruitment process through the onboarding process. The tips and tools include finding potential candidates, recruitment financial package, interview questions and integrating new physicians into your practice.

- **Credentialing and Privileging in New Procedures and Technologies *Thomas Forbes, M.D., FRCSC, FACS, DFSVS***

Credentialing and Privileging in New Procedures and Technologies summarizes the critical elements for initial
