

Patient Education Fliers

Patient Education Fliers

Patient Information Fliers from the SVS Foundation

The SVS Foundation has begun updating and rewriting the SVS patient education fliers. The fliers were written and developed by Drs. Tej Singh and Benjamin Pearce. For physicians, each flier is offered in several formats, which can be downloaded and printed. The fliers are available in both English and Spanish.

For physicians:

- High resolution, high quality flier pdfs with writable space for your name and contact information. These would be used to send to a print shop for quantities of 100 or more to have on hand in your office.
- Lower resolution flier pdfs with writable space for your name and contact information. These are easy to print off on your own office copier and hand to the patient on the spot.

For patients and website visitors:

- Lower resolution flier pdfs with a link to "Find a Specialist" on the SVS website. These will be available online or for use by organizations and events, such as an AAA screening for the public.

In the first phase, nine fliers have been created on vascular disease topics and lifestyle issues that affect vascular health. All fulfill the Foundation's mission to support patient education, vascular health and community awareness of vascular disease.

The advantage to using downloadable fliers is that each SVS member can download the fliers of use in his or her office and get them printed instantly.

Please note: The fliers are copyrighted by the SVS but are open source and free for use by SVS members.

Flier topic	English versions [PDF]	Spanish versions [PDF]
Abdominal Aortic Aneurysm (AAA)	High resolution for print shop Lower resolution for office printing	Alta resolución para imprenta Baja resolución para impresión de oficina
