Quality Improvement and Reporting: A Survival Guide for Your Practice

The SVS Community Practice Committee, Clinical and Comparative Effectiveness Research Committee and the Quality and Performance Measures Committee developed this breakfast session to provide practical tips and tools for quality improvement at the 2016 Vascular Annual Meeting.

At the end of this session, participants should be able to:

- Recognize current quality reporting standards and future requirements.
- Review practical tools and guides for implementing quality assessment programs.
- Discuss strategies to engage hospitals in adopting quality assessment programs.

Please note that CME is not offered for viewing these videos, which have been provided as a resource only.
