This year’s meeting will again highlight the latest advances in vascular surgery with three leaders in the broad spectrum of our specialty - from the University of North Carolina at Chapel Hill, Dr. William “Bill” Marston and Dr. Mark Farber; and Dr. Timothy Sullivan from the University of Minnesota. Dr. Sullivan has been instrumental in our association with the Annals of Vascular Surgery. We are also bringing back our focused practice sessions with a
session on dialysis access management. The combination of our esteemed professors, focused practice update and our usual member generated topics will provide a wide-ranging program that will be educational, entertaining and useful in our rapidly evolving specialty.
