

Management of Aortic Rupture Workshop Zurich (MARZ)

# Management of Aortic Rupture Workshop Zurich (MARZ)

Wednesday, February 3, 2021 to Thursday, February 11, 2021

University Hospital Zurich

Dec. 23 to Feb. 11

[Register](#)

A special anniversary of Vascular Surgery at the University Hospital Zurich is approaching. For the 10th time, we are now organizing the "Management of Aortic Rupture Workshop Zurich" (MARZ). During the last 9 events, this course has lived on the active participation of the course participants, direct interaction, and practical exercises. Due to this unique concept, all course places were always fully booked within a few days. Although the current Corona situation does not make a course in the usual form possible, we would like to hold on to our tradition. For this anniversary edition, we are running an online workshop spread over 4 days with different topics on aortic rupture. The workshop days for this are February 03-04 and 10-11, 2021 (17:00 CET).

We were able to put together a great faculty with an exciting program. No aspect in the treatment of ruptured aneurysms will remain unanswered. Registration is free.
