In 2019, vascular surgeons will be confronted with more treatment choices than ever before in practically all vascular territories that we treat. Innovative new technologies and techniques, new device/drug combinations, and even new designs of old technology herald in the next era of vascular science. We also know that all that glitters is not gold. How do these new technologies compare to one another and how do they stack up against surgical outcomes? Are they complementary or competitive? Science is scarce and opinion is rife, yet we must winnow what is true and significant and in the best interest of our patients.

**Lodging:**
Park Central San Francisco  
50 Third Street  
San Francisco CA 94103  
Hotel Phone: 415-974-6400
