PAD Resources for Physicians

CLINICAL PRACTICE GUIDELINES FOR PAD AND RELATED DISORDERS

PAD Clinical Practice Guidelines Pocket Card
One of our most popular pocket guidelines. From Guideline Central.

GUIDELINES

Society for Vascular Surgery Practice Guidelines for Atherosclerotic Occlusive Disease of the Lower Extremities: Management of Asymptomatic Disease and Claudication
J Vasc Surg 2015; published online January 28, 2015

- A systematic review for the screening for peripheral arterial disease in asymptomatic patients.
- A systematic review of treatment of intermittent claudication in the lower extremities.

- A systematic review and meta-analysis of glycemic control for the prevention of diabetic foot syndrome.
- A systematic review and meta-analysis of tests to predict wound healing in diabetic foot.
- A systematic review and meta-analysis of débridement methods for chronic diabetic foot ulcers.
- A systematic review and meta-analysis of adjunctive therapies in diabetic foot ulcers.
- A systematic review and meta-analysis of off-loading methods for diabetic foot ulcers.
NEW PCORI FUNDING

Starting Sept. 3, 2019, the Patient-Centered Research Outcomes Institute has announced it has updated its Research Areas of Interest to include peripheral artery disease for the 2020 funding cycle.

The Broad PCORI (Patient-Centered Research Outcomes Institute) Funding Announcements (PFAs) seek investigator-initiated applications for patient-centered comparative clinical effectiveness research (CER) projects aligned with our priority areas for research. This PFA covers the following four priority areas: Addressing Disparities; Assessment of Prevention, Diagnosis, and Treatment Options; Communication and Dissemination Research, and Improving Health Systems. These broad areas encompass the patient-centered comparative CER we support.
