

Vascular Quality Initiative

Vascular Quality Initiative

Improving Vascular Care Through the VQI

The Vascular Quality Initiative® improves the quality, safety, effectiveness and cost of vascular health care by collecting, analyzing and sharing data on pre-operative risk factors, intra-procedural variables, post-procedural outcomes, and one-year follow-up data.

The VQI consists of a distributed network of regional quality groups that function under a SVS AHRQ-listed Patient Safety Organization using the M2S PATHWAYS cloud-based data collection and reporting system.

The Benefits of VQI Membership

- Increase return on investment (ROI) by reducing length of stay through quality initiatives
- Develop best practice through participation in Regional Quality Groups
- Develop quality improvement at your practice or institution
- Enhance patient safety through VQI Quality Research Projects and VQI Medical Device Evaluation Projects

VQI Membership: Facts and Figures

- 3,500+ participating physicians across vascular surgery, cardiothoracic surgery, neurosurgery, radiology and general surgery, neurology and cardiology specialties
- Over 650 participating centers including hospitals, outpatient centers, vein clinics and physician practices across 46 states and Canada
- Over 650,000+ procedures captured across 14 VQI Registries
