New this year, the SVS Community Practice Committee has curated 2017 Vascular Annual Meeting program’s offerings to further help private practice attendees more easily navigate the meeting via a listing of recommended sessions/abstracts of particular interest to this audience. To easily identify these sessions/abstracts in the program, you’ll find a unique icon (see top left) denoting these audiences.

**Wednesday, May 31, 2017**

7:00 - 10:00 am  
**P1:** Updates and Troubleshooting in Dialysis Access  
**P2:** Complications Associated with Routine EVAR

7:30 - 11:30 am  
**V1:** VESS Paper Session 1  
  - VESS01: Real World Experience with Gore IBE for Treatment of Bilateral Common Iliac Artery Aneurysms  
  - VESS02: Effect of Operator Specialty on the Outcomes of Carotid Artery Revascularization  
  - VESS03: Quantitative Analysis and Predictors of Embolic Filter Debris Load During Carotid Artery Stenting in Asymptomatic Patients  
  - VESS04: Catching a Moving Target: Malpractice Litigation in the Endovascular Era  
  - VESS05: Long-term Freedom from Aneurysm Related Mortality Remains Favorable After Endovascular Abdominal Aortic Aneurysm Repair in a 15-year Multicenter Registry  
  - VESS06: Clinical Outcome of Ultrasound-Accelerated Catheter-Directed Thrombolytic Therapy for the Treatment of Submassive Pulmonary Embolism  
  - VESS09: Strategies to Decrease Wound Complications Following Open Infrainguinal Revascularization  
  - VESS10: ICU Admission After EVAR Is Primarily Determined by Hospital Factors, Adds Significant Cost, and Is Often Unnecessary  
  - VESS11: Lower Extremity Bypass and Endovascular Intervention for Critical Limb Ischemia Fail to Meet Society for Vascular Surgery’s Objective Performance Goals for Limb-Related Outcomes in a Contemporary National Cohort  
  - VESS13: Peroneal Bypass versus Endovascular Peroneal Intervention for Critical Limb Ischemia  
  - VESS14: Early Validation of a Tool to Standardize Vascular Access Procedure Selection for Hemodialysis  
  - VESS16: Study to Assess Outcomes for Multiple TEVAR Pathologies (SUMMIT) Registry
8:00 - 10:00 am
**W1:** Managing Crossing Long CTO  
**W2:** Management of Outpatient Angio Suites  
**W3:** Pedal/Alternative Access

10:15 am - 1:15 pm  
**P4:** New Horizons in Treatment of Extra-Cranial Cerebrovascular Disease

12:30 - 2:45 pm  
**FT:** International Fast Talk  
  - **FT07**  Anatomical Predictors of Long-Term Mortality After Standard EVAR  
  - **FT08**  Transcranial Doppler at 24 Hours After Carotid Endarterectomy Is Optimal for the Prediction of Cerebral Hyperperfusion Syndrome  
  - **FT13**  Hybrid Salvage for Thrombosed Autogenous Hemodialysis Access  
  - **FT18**  Distal Bypass for Chronic Limb Threatening Ischemia of the Upper Extremity  
  - **FT20**  Microcalcification Predicts Abdominal Aortic Aneurysm Expansion and Repair: The 18F-Sodium Fluoride Imaging in Abdominal Aortic Aneurysms (SoFIA3) Study  
  - **FT22**  Endovenous Heat Induced Thrombosis After Radiofrequency Ablation for Varicose Veins – When and Why It Happened?

12:30 - 4:00 pm  
**V2:** VESS Paper Session 2  
  - **VESS17**  Upper Extremity Access for Fenestrated-branched Endovascular Aortic Repair  
  - **VESS18**  CTA-Fluoroscopy Image Fusion Guidance Allows Visceral Vessel Cannulation Without Angiograms During Fenestrated Endovascular Aortic Repair  
  - **VESS19**  Upper Extremity Interventions for Critical Ischemia  
  - **VESS20**  Distal Vein Patch Use and Limb Events Following Infragenicular Prosthetic Bypasses  
  - **VESS24**  Duplex Ultrasound Assessment and Outcomes of Renal Malperfusion Syndromes After Acute Aortic Dissection  
  - **VESS26**  Presence and Degree of Residual Venous Obstruction on Serial Duplex Imaging Increases the Risk of Recurrence and Progression of Lower Extremity Deep Venous Thrombosis  
  - **VESS27**  Alternative Access for Fistula Cannulation in the Obese: Midterm Results from VWING Registry  
  - **VESS28**  Outcomes of Forearm Loop Grafts and the Potential for Creating New Upper Arm Access Sites

1:30 - 3:30 pm  
**W8:** Translumbar, Transarterial and Transcaval Embolization Techniques for Type II Endoleaks

2:00 - 5:00 pm  
**P5:** SVS/APMA Joint Session: Advances in Wound Care and Limb Management  
*Developed in conjunction with the SVS Community Practice Committee*
3:00 - 6:00 pm
**C1: International Forum**

**IF01**
30-day Results from Prospective Multicenter Evaluation of Carotid Artery Stenting Using the CGuard Micronet-covered Embolic Prevention Stent System in Real World Population: the IRON-GUARD Study

**IF12**
Standard EVAR for Aneurysms with Large Neck Diameter Results in Higher Risk of Type 1A Endoleak and Rupture

**IF14**
Collected World Wide Experience from the PERICLES Registry with the Use of Chimney Grafts in the Treatment of Type I Endoleaks After Previous Endovascular Aneurysm Repair Shows Reproducible Results

4:00 - 6:00 pm

**W10:** Rapid-Fire Update on Billing and Coding

**W11:** Deep Venous Interventions

5:00 - 6:30 pm

**C3:** Practice Management Tips and Tricks for Young Vascular Surgeons

6:45 - 7:45 pm

General Surgery Resident/Medical Student Program - Welcome Reception

**Thursday, June 1, 2017**

6:30 - 8:00 am

**B2:** Boston Scientific - Rapid Thrombus Removal for Acute DVT: A Case-Based Discussion

**B3:** Siemens - Meet the Experts...Maximizing the Utilization of 3D Imaging and Image Guidance in Hybrid Operating Rooms: What Does a Vascular Surgeon Need to Know?

8:00 - 8:30 am

Opening Ceremony

8:30 - 10:15 am

**S1:** William J. von Liebig Forum

**SS01**
Characterization and Outcomes of Reinterventions Following EVAR

**SS02**
Standard EVAR in Patients with Dilated Infrarenal Necks Requiring a 34-36mm Endograft Is Associated with Increased Risk of Type 1a Endoleak and Stent Migration

**SS03**
Long-Term Analysis of Endoleak Onset and Evolution Following Abdominal Aortic Endovascular Repair Using Multiple Grafts

**SS04**
Outcomes of Explants versus Fenestrated-Branched Endovascular Aortic Aneurysm Repair After Failed Endovascular Aortic Aneurysm Repair

**SS05**
Safety and Feasibility of Endovascular Aortic Aneurysm Repair as Day Surgery: Results of a Prospective Trial

**RS01**
Hospital Volume Impact on Patient Safety Indicators and Failure to Rescue Following Open Abdominal Aortic Aneurysm Repair
RS02
Three Year Outcomes of the IMPROVE Trial for Ruptured Abdominal Aortic Aneurysm
VS01
Neo-aortoiliac System (NAIS) Procedure for Infected Aortobifemoral Graft
VS02
Open Extraction of an Infected Aortic Endograft

10:15 - 10:30 am
Vascular Quality Initiative Update

10:30 am - Noon
F1: E. Stanley Crawford Critical Issues Forum

1:30 - 2:45 pm
S2: Plenary Session 2
SS07
Crescendo and Single TIA: Two Different Scenarios of Urgent Carotid Revascularization
SS09
Risk and Outcome Profile of Carotid Endarterectomy with Proximal Intervention Is Concerning in Multi-Institutional Assessment
RS04
Natural History of Progression of Carotid Artery Stenosis
VS03
Giant Carotid Body Tumors

4:00 - 5:30 pm
S3: Plenary Session 3
SS12
Long Term Outcomes of Indwelling Vena Cava Filters
VS04
Open Reconstruction of Severe Superior Vena Cava Syndrome with Right Internal Jugular – Superior Vena Cava Bypass Using Femoral Vein
VS05
Massive Pulmonary Embolism: Catheter Directed Rescue Techniques
SS14
Outcomes Comparison of Chest Wall Arteriovenous Grafts and Lower Extremity Arteriovenous Grafts in Patients with Long-standing Renal Failure
SS15
Immediate Access Grafts Provide Comparable Patency to Standard Grafts, with Faster Cannulation, Fewer Reinterventions, Catheter Days, and Catheter-Related Complications
VS06
The Radar Artery Deviation and Reimplantation Technique of Arterio-Venous Fistula Creation
5:00 - 6:30 pm
IP: Interactive Poster Session

IP003
Racial Disparities in Endovascular Aortic Aneurysm Repair

IP013
Octogenarians Undergoing Open Repair Have Higher Mortality Compared to Fenestrated Endovascular Repair of Intact Abdominal Aortic Aneurysms Involving Visceral Vessels

IP021
Gender Differences in Aortic and Iliac Artery Anatomy in Patients Undergoing Endovascular Aneurysm Repair

IP023
The Effect of Surgeon and Assistant Volume on Outcomes Following Open Repair of Abdominal Aortic Aneurysms

IP027
A Preoperative Risk Score for Transfusion in Infrarenal Endovascular Aneurysm Repair to Avoid Type and Cross

IP041
Evaluation of PEVAR Therapeutic Benefits in a Large Single Center Experience

IP043
Hypogastric Preservation Using Retrograde Endovascular Bypass

IP047
IFU Violation and Anatomic Factors Are Strongest Predictors of Clinically Significant Type II Endoleaks

IP051
Failure to Rescue After In-hospital Major Complications Is Equivalent in Open and Endovascular Abdominal Aortic Aneurysm Repair

IP053
Differences in Endovascular Aortic Aneurysm Repair (EVAR) Presentation and Outcomes Based on Method of Aneurysm Discovery

IP069
Suppression of the Hospitalization Length and Costs During Open Repair for Abdominal Aortic Aneurysm Is Achieved by High Quality Surgery and Enhanced Recovery Program Rather Than Patients’ Background

IP075
Elective Open Abdominal Aortic Aneurysm Repair Following Prior EVAR with Unsatisfactory Results Is Not Associated with Increased Mortality or Major Morbidity

IP079
Outcome Comparison Between Open and Endovascular Management of TASC II D Aortoiliac Occlusive Disease

IP089
Options for Preservation of Pelvic Circulation During Endovascular Aortic Aneurysm Repair

IP095
Long-Term Survival of Ruptured Abdominal Aortic Aneurysms in the Contemporary Endovascular Era

IP109
Temporal Trends in Perioperative Safety of Carotid Endovascular Treatment in Average-risk Symptomatic Patients – Systematic Review

IP111
Safety of Emergent Carotid Endarterectomy in Symptomatic Patients Is Dependent on Presenting Symptoms

IP115
Statin Use and Intensity After Carotid Endarterectomy Does Not Affect Short-term Stroke and Myocardial Infarction Rates

IP139
Is Obesity Associated with Elevated Radiation Exposure During Endovascular Aortic Aneurysm Repair?
IP151  Timing of Preoperative Ultrasound in Selection of Vascular Access for Hemodialysis
IP155  A Completely Endovascular Technique for the Treatment of Dialysis-associated Steal Syndrome
IP157  Modified Banding of Fistulas for Steal Syndrome with Quantitative Data
IP159  Use of Hemodialysis Reliable Outflow (HeRO) with Immediate Access Arteriovenous Grafts
IP185  Institutional Retrospective Review of Ultrasound-accelerated Arterial and Venous Thrombolysis
IP189  Is Patient Satisfaction Improved by Showing Patients Their CT and Angiographic Images Prior to Undergoing Vascular Surgery?
IP191  Thirty-day Readmission in Vascular Surgery Patients: Analysis of the Premier Database
IP197  Reintroduction of the Gritti-Stokes (Above – Knee) Amputation
IP209  Through Knee Amputation: A Feasible Alternative to Above Knee Amputation
IP231  Kidney Transplant Increases the Risk of Ipsilateral Critical Limb Ischemia
IP237  Natural History and Management of Renal Artery Aneurysms in a Single Tertiary Referral Center
IP247  Community Based Vascular Disease Screening of More Than 4200 Patients - What Do the Results Tell Us
IP255  A Black Box or Pandora's Box? Malpractice Litigation and Inferior Vena Cava Filters
IP259  Persistent Symptoms After Endovenous Thermal Ablation: Proximal Venous Outflow Obstruction in Superficial Venous Disease

5:30 - 6:30 pm
Opening Reception

**Friday, June 2, 2017**

6:30 - 8:00 am
**B4**: Pushing the Boundaries in the Management of Peripheral Arterial Disease
**B5**: Management of Arterial Infections

8:00 - 9:30 am
**S4**: Plenary Session 4

**SS18**
Long Term Outcomes of Lower Extremity Graft Preservation Using Antibiotic Bead Placement in Patients with Early, Deep Wound Infection After Major Arterial Reconstructions

**RS06**
A Randomized Study Evaluating Negative-Pressure Therapy to Decrease Vascular Groin Wound Complications
RS08
Medicare Claims Data Suggests That Atherectomy for Infra-inguinal Occlusive Disease for Claudication Results in Outcomes Worse Than the Natural History of the Disease

10:00 - 11:00 am
S5: Plenary Session 5
  VS08
  Hypothenar Hammer Syndrome -Surgical Repair

11:15 am - 12:15 pm
President Address

1:30 - 3:00 pm
S6: Plenary Session 6
  SS30
  Vascular Surgery Patients with Coronary Drug-Eluting Stents Have a Significantly Increased Risk of Perioperative MI Despite the Use of Appropriate Antiplatelet Medications

3:30 - 5:00 pm
C5: SVS/ESVS Joint Debate Session
C7: SVS/AVF Joint Session: How and When to Treat Deep Venous Obstructions
C8: Beyond Just Vascular Disease: The Vascular Surgeon in a Collaborative Role
C9: Update on Society for Vascular Surgery Clinical Practice Guidelines
C10: Poster Competition
  PC014
  Challenging Iliac Anatomy in Fenestrated Endovascular Aortic Aneurysm Repair
  PC034
  Juxtarenal Endovascular Therapy with Fenestrated and Branched Stentgrafts After Previous Infrarenal Repair
  PC038
  The Impact of Contrast Media Volume Used During Endovascular Aneurysm Repair on Short and Long Term Renal Function
  PC060
  Reoperation Following Lower Extremity Amputation
  PC062
  Anterior Lumbar Exposure in Obese Patients and Outcomes
  PC070
  Complications of Percutaneous Endovascular Repair for Ruptured Aortic Abdominal Aneurysms Are Uncommon
  PC084
  Natural History and Management of Splanchnic Artery Aneurysms in a Single Tertiary Referral Center
  PC104
  The Role of Duplex Ultrasound in Assessing AVF Maturation
  PC108
  Evaluation of an ePTFE Endograft Placed at the Time of Arteriovenous Fistula Creation to Prevent Juxta-anastomotic Stenosis and Improve Maturation and Long Term Patency Rates
  PC118
  Carotid Endarterectomy versus Carotid Stenting: 10-year Comparative Analysis
  PC128
  Trends in Drug Utilizations for Patients with Peripheral Arterial Disease
PC140
Safety and Effectiveness of antegrade Superficial Femoral Artery Access in an Office-based Ambulatory Setting
PC158
Long-term Outcomes After Endovascular Stent Placement for Symptomatic, Long-Segment Superficial Femoral Artery Lesions
PC166
A Matched Case-control Study on Open and Endovascular Treatment of Popliteal Artery Aneurysms
PC172
Coverage of the Left Subclavian Artery in Blunt Thoracic Aortic Injury Is Not Necessary to Achieve Aortic Healing in Patients with Short Proximal Landing Zones
PC186
Silent Deep Venous Thrombosis: Associations with Proximal Venous Outflow Obstruction and Hypercoagulation Markers

**Saturday, June 3, 2017**

6:30 - 8:00 am

**B7:** Beyond the Basics of Hemodialysis Access
**B8:** The Treatment of Chronic Venous Leg Ulcers

8:00 - 9:00 am

**S7:** Plenary Session 7

RS10
Clinical Trial and Real World Outcomes of Endovascular Iliac Aneurysm Repair with the Gore Iliac Branch Endoprosthesis (IBE)

9:00 – 10:00 am

**S8:** Plenary 8/"Late Breaking" & VQI

RS16
Does the Choice of Anesthesia Affect Hospital Outcomes after Carotid Endarterectomy? An Analysis from the Vascular Quality Initiative Database

RS17
The Age Effect on Postoperative Stroke and Mortality Following Carotid Artery Endarterectomy

RS18
Comparison of Non-Autologous Biologic Grafts Versus Prosthetic Grafts Used for Infrainguinal Bypass for Critical Limb Ischemia

RS19
The Impact of Smoking on Outcomes in Claudicants Undergoing Lower Extremity Bypass: How Much Does it Matter?

RS20
Differences in Females Presenting with Superficial Femoral and Popliteal Artery Disease with Inferior Endovascular Outcomes

SS35
Trans-axillary Decompression of Thoracic Outlet Syndrome Patients Presenting with Cervical Ribs
10:30 am - 12:00 pm

**C12:** SVS/SVM Joint Session: Medical Management of Vascular Disease

**C13:** SVS/SVN Joint Session: Building the Vascular Team - Evolving Collaboration of Surgeons and Nurses

**C14:** SVS/SVU Joint Session: Organization, Operation and Management of a Vascular Laboratory

1:30 - 3:30 pm

**VH:** "How I Do It" Video Session

- **VH01**
  Aortic Endarterectomy

- **VH02**
  Percutaneous In-situ Fenestration of Left Subclavian Artery During Thoracic Endovascular Aortic Repair

- **VH03**
  Lower Extremity Adductorplasty During Superficial Femoral Artery Stenting

- **VH04**
  Endovascular Aortic Aneurysm Repair with a CO2 Automated System

- **VH05**
  Paravertebral Catheter Insertion During Retroperitoneal Aortic Aneurysm Repair

- **VH06**
  Percutaneous Access Site Control in Complex Endovascular Aortic Interventions

- **VH07**
  Carotid Body Tumor Resection

- **VH11**
  Open Surgical Treatment of Symptomatic Juxtarenal Aortic Occlusion

1:30 - 5:00 pm

Ultrasound Physics and Vascular Test Interpretation - Physician Vascular Interpretation Examination Review
