ANNUAL MEETING INFORMATION

The Southern California Vascular Surgical Society’s **34th Annual Meeting will be held April 29-May 1, 2016 at the beautiful Lodge at Torrey Pines, La Jolla, CA.**

The Meeting commences with the Welcome Reception on Friday evening, April 29th. Scientific Sessions will be held on Saturday and Sunday, April 30th and May 1st. A Dinner also will be held on Saturday evening, April 30th for all registrants. The 34th Annual meeting will conclude with the SCVSS Member Business Meeting on Sunday morning, May 1st.

The Lodge overlooks the world-renowned Torrey Pines Golf Course with spectacular views of the Pacific Ocean beyond. Built in the classic Craftsman style, this warm and inviting atmosphere of rich woods, leather and open fireplaces is further enhanced by the staff’s attention to detail and genuine hospitality. The Lodge is home to The Spa at Torrey Pines and A.R. Valentien, a signature farm-to-table restaurant. The resort is located adjacent to the Torrey Pines State Reserve, a two-thousand acre coastal state park featuring miles of hiking trails through golden sandstone formations and rare Torrey pine trees.

Dr. Jason Chiriano and the Program Committee have arranged from the large number of submissions an outstanding scientific meeting. This proves to be an interesting, thought-provoking, and, most importantly, educational meeting featuring a mixture of original scientific articles, retrospective reviews, and amusing anecdotes (case reports) and video presentations.

Highlights of the Meeting include planned outstanding presentations by distinguished speakers: Dr. Julie A. Freischlag, Vice Chancellor for Human Health Sciences and Dean of the School of Medicine, UC Davis in Sacramento and Dr. Peter A. Schneider, Chief, Division of Vascular Therapy, Hawaii Permanente Medical Group, Honolulu, HI.

Again this year, the Society has applied for Self-Assessment Credit that meets the ABS requirements for MOC Part 2 for the Annual Meeting.
LEARNING OBJECTIVES
Topics will be presented which relate to the clinical treatment vascular surgery patients. Presentations will focus on best surgical practice and expert opinion. At the end of this activity, participants will be able to:

1. Participants must be able to effectively manage paravisceral aortic aneurysms with the available endovascular modalities available. They must also recognize that this is emerging therapy and long term outcomes have yet to be clearly defined.
2. Must be able to critically evaluate the current management of carotid stenosis and the current surgical options available.
3. Gain an understanding of advanced hybrid techniques for dialysis access salvage.
4. Gain an understanding of tailored patient populations with peripheral vascular disease and lower extremity wounds. This will lead to an individualized approach to each patient and potentially decrease patient morbidity.
5. Understand how robotic technology can be applied to current endovascular therapy to help improve technical success. Must gain a practical understanding of the logistics of implementing a robotic program in each institution.

CME CREDIT
Approval of CME Credit is pending.
