**Society for Vascular Surgery
2024 Vascular Annual Meeting
Submission Policies**

Author

It is SVS policy that either the submitting author or one of the co-authors of each abstract be an SVS member. If neither the submitting author nor the co-authors are members, then a member must sponsor the abstract. SVS sends all correspondence to the submitting author or member sponsor regarding the submission. **Papers may be presented by a student, resident or fellow; however, the senior author must be present in the audience during the discussion phase of the paper.** The presenting author must have a command of the English language and be able to respond to questions in understandable English.

For Vascular and Endovascular Surgery Society (VESS) session submissions, it is the policy of VESS that either the submitting author or one of the co-authors of each abstract **must** be a member of VESS. If neither the submitting author nor the co-authors are VESS members, then a VESS member must sponsor the abstract.

Redundant Publication/Presentation Withdrawal

The work represented in the abstract must **NOT** have been presented, published, or submitted to any other major meeting or journal prior to that year's Vascular Annual Meeting except for:

- Local/regional meetings
- Vascular Research Initiatives Conference (VRIC)

It is the responsibility of the submitting author or sponsoring SVS member to consult with the Program Committee prior to submission if there is any question regarding possible redundancy of the work to be presented. Direct inquiries to vameducation@vascularsociety.org.

Failure to comply with the above rules will result in the abstract being rejected or later withdrawn. In addition, the penalty will be a one-year ban from presentation at the Vascular Annual Meeting, subject to the discretion of the Program Committee (the only exception to dual submission is the American Surgical Association (ASA) Annual Meeting). If the abstract(s) is/are accepted for the ASA Annual Meeting, the author will need to notify SVS immediately to withdraw the abstract from the Vascular Annual Meeting.

Journal Publication

While manuscript submission to one of the *Journal of Vascular Surgery (JVS)* journals is required for full-length and rapid-paced abstracts presented during the plenary & VESS sessions, there is no guarantee of acceptance. (Submission is not mandatory for any of the other program types.) Manuscript submissions must conform to *JVS* policies on originality and conflict of interest disclosure. Most accepted abstracts will be published in an online-only supplement to a regular monthly issue of the *JVS* and will be available online at the time of the Vascular Annual Meeting.

Contact jvascsurg@vascularsociety.org with questions.

Chicago, IL • June 19-22

National/Regional Meetings

An abstract accepted to the Poster Competition that has not been submitted as a paper to the *Journal of Vascular Surgery* does not preclude submission to the following regional and national society meetings:

- Eastern Vascular Society
- Western Vascular Society
- New England Society for Vascular Surgery
- Vascular and Endovascular Surgery
- Society for Clinical Vascular Surgery

If a paper has been accepted to the Eastern Vascular Society or Western Vascular Society annual meetings, it precludes presentation at the “Championship Round”. However, the poster may still be presented at the Poster Competition.

AI Policy

Where authors use generative artificial intelligence (AI) and AI-assisted technologies in the writing process, authors should only use these technologies to improve readability and language. Applying the technology should be done with human oversight and control, and authors should carefully review and edit the result, as AI can generate authoritative-sounding output that can be incorrect, incomplete or biased. AI and AI-assisted technologies should not be listed as an author or co-author, or be cited as an author. Authorship implies responsibilities and tasks that can only be attributed to and performed by humans, as outlined in Elsevier’s [AI policy for authors](#).

Disclosure instructions

Authors must disclose the use of generative AI and AI-assisted technologies in the writing process by adding a statement at the end of their manuscript in the core manuscript file, before the References list. The statement should be placed in a new section entitled ‘Declaration of Generative AI and AI-assisted technologies in the writing process’.

Statement: During the preparation of this work the author(s) used [NAME TOOL / SERVICE] in order to [REASON].

After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.

This declaration does not apply to the use of basic tools for checking grammar, spelling, references, etc. If there is nothing to disclose, there is no need to add a statement.

More information can be found at the SVS website: <https://vascular.org/vascular-specialists/research/journals/declaration-generative-ai-scientific-writing>
