SVS CPVI Skills Course

All-Star
Faculty*

The SVS CPVI course is designed *by* vascular surgeons *for* vascular surgeons. The 2-day program gives vascular surgeons the chance to learn from experts in the field during didactic and case-based learning and to practice the latest procedures on cadavers and benchtop models during small-group simulations.

"SVS members have asked for this type of course to keep up to date with their endovascular skills"

*-Vikram Kashyap, MD
Course Co-Director*

Core Focus Points

- Retrograde tibial & pedal access with cadaver limbs
- Pedal loop imaging and techniques with cadaver limbs
- Deep venous arterialization with cadaver limbs
- IVUS with cadaver limbs
- Atherectomy devices
- Aspiration/peripheral thrombectomy catheters
- Reentry devices
- Closure devices
